

# How to Clear Browser Cache: Recommended Procedure after each Pegasus Update

Pegasus uses your browser cache to store application-related JavaScript files, which support specific application functionality. Occasionally, after an application update you may experience usability issues because the files stored in your browser cache are out of date. Therefore, we recommend that if your course begins to exhibit unexpected behavior you should clear your browser cache to see if that resolves the issue before you contact Customer Technical Support.

To delete all of the files currently stored in your browser cache, follow the directions provided for your specific browser.

Browser	To clear cache...
Internet Explorer 6.x	<ol style="list-style-type: none"><li>1. From the browser <b>Tools</b> menu, click <b>Internet Options</b>.</li><li>2. On the <b>General</b> tab, in the <b>Temporary Internet files</b> section, click <b>Delete Files</b>.</li><li>3. Select <b>Delete all offline content</b>, and click <b>OK</b>.</li></ol>
Internet Explorer 7.x	<ol style="list-style-type: none"><li>1. From the browser <b>Tools</b> menu, click <b>Internet Options</b>.</li><li>2. On the <b>General</b> tab, in the <b>Browsing history</b> section, click <b>Delete</b>.</li><li>3. In the <b>Temporary Internet Files</b> section, click <b>Delete files</b>.</li><li>4. To confirm the deletion, click <b>Yes</b>.</li></ol>
Safari 3.1.2 <sup>+</sup>	<ol style="list-style-type: none"><li>1. From browser <b>Safari</b> menu, click <b>Empty Cache</b>.</li><li>2. To confirm the deletion, click <b>Empty</b>.</li></ol>
